# IFS

## INDUSTRIAL FILTER SERVICES LTD... breathe easy

At IFS we bring a solid track record of over 25 YEARS EXPERIENCE in the DUST CONTROL industry and within our Engineering division, we offer full TURNKEY capabilities.

We focus on forming STRATEGIC PARTNERSHIPS not only with our CUSTOMERS but also with our SUPPLIERS. Being DEPENDABLE and developing a REPUTATION for producing the right solution at the RIGHT PRICE is given our up-most priority.

## Engineering Division

In partnering IFS, we can provide you with access to an experienced and reputable company. Our Engineering division have turnkey capabilities from initial auto CAD design, manufacture to final installation.

IFS provide engineered solutions using the “best available technology” focusing on providing the right solution at the right price.

### We offer a full range of filtration solutions typically:

- Reverse jet bag filters
- Reverse jet cartridge filters
- Silo vent filters
- Auto shake clean filters
- Manual shake clean filters
- Floor mounted fansets
- Oil mist collection
- CVC Centralized vacuum cleaning plant

Our wealth of experience within the engineering sector is second to none, providing dust and fume extraction solutions to many manufacturing sectors.

- Agriculture
- Minerals
- Plastics
- Animal feeds
- Brewing
- Chemical paper
- Pharmaceutical
- Ceramics
- Coal
- Foundry
- Food
- Automotive
- Sand & cement pigments & dyes

## Timber Division

Our IFS Timber division provide a cost effective solution designed to control wood dust & wood chippings.

IFS offer a turnkey service from bespoke auto CAD design through to manufacture and installation. All IFS timber division products comply to current ATEX regulations involving the safe handling of explosive dust material.

A wide range of filtration products are available including:

Tubular bag chain filter units  
Tubular bag rotary valve filter units  
Cyclonic filter units  
Auto shake clean filter units  
Open sock filter units  
Storage silos & wood burners  
Chippers & Briquetters

Our vast experience within the Timber sector allows us to provide dust extraction solutions to many timber manufacturing sectors, including:

- Panel manufacturing
- Joinery workshops
- Chipboard plants
- Sawmills
- Pattern shops

## Maintenance Division

At IFS we realise that correct planned maintenance of dust collectors is critically important to extend the performance and service life of the equipment. Often resources are not available to achieve this. We are able to offer cost effective service agreements for all dust collectors including spares at extremely competitive price's

### Planned filter maintenance & LEV-COSHH testing

To keep up to date with legislation and minimise the possibilities of breakdowns, which could result in loss of production and high repair costs, IFS provide a planned maintenance worry free service. Our new range of Blue Chip service agreements provide customer flexibility by offering two service contract options.

### Blue Chip Standard Service

The Blue Chip Standard Service offers an annual contract with a single site visit to enable IFS to carry out an LEV/COSHH test, as legally required under COSHH regulation 9. We would then carry out maintenance checks on all filter units, providing a full written report along with recommendations, if necessary, of any remedial work to be carried out.

### Blue Chip Plus Service

The Blue Chip Plus Service offers a two year contract, with two site visits per annum to carry out maintenance checks combined with two annual LEV/COSHH tests.

Our dedicated IFS vehicles carry a range of spares that can be used, if suitable, for immediate replacement eliminating the need for secondary visits. Our IFS service team have a wealth of experience in testing and maintaining dust extraction systems, whether it be reverse jet filters to mechanical shake clean filters and woodwaste plants.

IFS can also supply replacement spares for all makes of dust extractors a few of which are listed below:

- Cartridge filter elements
- Tubular filter bags
- Flat pad filter bags
- Shaker filter bags
- Filter frames/cages/meshes
- Pulse valves & timers
